Grade

```c
#include <stdio.h>

int main()
{
    int see, cie, sum;
    printf("Enter cie and see marks : ");
    scanf("%d %d", &cie, &see);
    see = see/2;
    sum = cie + see;
    if (sum >= 90)
        printf("Your grade is S ");
    else if (sum >= 80)
        printf("Your grade is A ");
    else if (sum >= 70)
        printf("Your grade is B");
    else if (sum >= 60)
        printf("Your grade is C");
    else if (sum >= 50)
        printf("Your grade is D");
    else
        printf("Your grade is F");
}
```

```
Enter cie marks:                    46

Enter SEE marks:                    89

            Your Grade is: S
```
